Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over NASA Space Shuttle Program in view of Forward or Piening .

The NASA Space Shuttle Program has launched numerous spacecraft especially for the International space station into orbit with "advertisements" on them, ie. NASA, TRW, Delta, Boeing, etc. The NASA Space Shuttle Program has video cameras to view the satellites when launched and NASA has a web site to view all this over the internet. The NASA Space Shuttle Program launches various crafts of all sizes and shapes and with solar panels and the space station is of 100's of meters long. The two enclosed brochures show the shuttle used to launch various satellites with logos on them that advertise the company that made them that are in the business to make money from space even NASA charges customers.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to launch the satellites of Forward or Piening in the NASA Space Shuttle Program as it is another payload.
